Discover all taps on
our website

A wide range of models with timeless charm that blend in perfectly
with both the most classic and the most contemporary spaces.

Water is synonymous with life, the centre of the kitchen

Source of life, energy and resource, instrument of work and well-being. If we consider that there is life wherever there is water, we can understand the importance it deserves. And the kitchen, which is the place where we nourish wellness and nutrition, is the right place to dedicate special attention to this essential element. No other kitchen element is used as often as the tap: it gives space to hygiene and well-being, and allows you to drink and cook. The philosophy of Officine Gullo is intimately linked to the primordial element of water and this is why it is granted a key role in the kitchen, committing to make it functional, safe, as well as aesthetically appealing. Officine Gullo mixers represent the focal point of every kitchen. A component, such as tapware, thereby becomes not only an accessory, but an actual protagonist of the environment.

Exclusive design and mechanics

The constant research by Officine Gullo has led to the creation of a line of iconic products that redefine the aesthetic standards of both domestic and professional mixers and taps. These precious artefacts have buried their roots in the centuries-old tradition of the most refined craftsmanship, combining noble materials to the new standards in design and modern luxury. Every product tells a story, created through a unique collaboration that involves designers, engineers and artisans. The design of these artefacts is absolutely exclusive, the result of careful research and exploration that spans various sectors: from mechanics to hydraulics, to the nautical sector, in which some control levers and knobs are eye-catching. The result is objects that look like works of art – unique and inimitable.

Details of monocommand mixer and Petal lever

Choosing the finest materials

The thickness of the noble metals – solid brass castings – with which the taps are made, are immediately evident. The weight of the taps is the immediate confirmation of this. The chosen materials are treated to meet the standards that require no lead and guarantee a long life.

Guaranteed durability

With great sensitivity for resources to be used efficiently and constant commitment to the development of elegant and functional products, Officine Gullo pays great attention to the engineering aspect: a meticulous design applied to the various development phases that allows great care to be paid to every detail and ensures that the company ensures the durability of its taps, guaranteeing 5 years warranty for every product.

Several styles in a single collection

Officine Gullo taps are available in a wide range of models with timeless charm that blend in perfectly with both the most classic and the most contemporary spaces. Some models offer the possibility of choosing, for example, the type of knob, and immediately distinguish the environment with a more classic or industrial character.

Attention to ecology

Officine Gullo offers "energy saving" solutions, measures to minimise the waste of water, such as standard flow regulators.

Multiple shapes and features

The possibility to choose between a mixer or knobs, a countertop or wallmounted faucet rather than a folding faucet, covers all possible customer needs.

Not only that, the features are also numerous. Alongside the classic kitchen faucets and mixers, there are:

- pot-filler mixers with extensible shower and jointed pot-filling faucets
- countertop showers
- folding mixers

Different knobs to style your tap

The collection integrates perfectly with traditional and more contemporary spaces due to being able to choose from three different types of handles, which lend an industrial or classic feel to the space.

CONE
Visually arresting levers with a striking retro feel.

PETAL
The reference to industrial design in which traditional stylistic elements are reinterpreted in a contemporary style.

LOBE
The style of this handle, which resembles a cog, is purely industrial. The milling gives good grip as well as bestowing a robust and functional look to the faucet.

ACETAOG03LOB burnished brass mixer faucet with Lobe levers

Brass available in three finishes

The entire collection of tapware is made of solid brass and is available in three different finishes, to best blend in with various projects and satisfy all preferences.

BURNISHED BRASS

The burnishing effect is carried out strictly by hand, and makes the surface uneven, darkens it, and recreates a sort of "appeasing ageing". Brass is not unchangeable but shows signs over time. It is alive and ages, revealing its beauty more and more.

SATIN NICKEL

The metal takes on a "warm" silvery hue and is then made opaque through a further brushing process.

POLISHED CHROME

The effect is that of "mirror" polishing, which adapts perfectly to the most modern and contemporary spaces.

Discover all sinks on
our website

Thanks to the manual skills of the artisans and the creativity of the designers, steel, copper and brass are loaded with aesthetic and functional pluses, which enhance the washing area of every kitchen.

Copper, brass and steel: only thick noble materials

Officine Gullo sinks are solutions of great charm, designed to add style, elegance and added value to the kitchen area: the authenticity of the material. Metals "of ancient memory" find unexpected and surprising application possibilities. Copper, brass and steel: noble materials that recall a past tradition are chosen and handcrafted in significant thicknesses ranging up to 4 mm, for undisputed and timeless charm. The choice to use these prestigious materials is dictated by their extraordinary qualities. Copper, for example, is one of the oldest material that have been used by mankind. Together with gold it is the only colored metal that can convey a warm and elegant hint to the ambience.

A unique craftsmanship

The processing is careful, knowledgeable and meticulous. Welds are in fact made exclusively by hand, because only the human eye reaches where the machine does not. The uniqueness of the processing of Officine Gullo can be recognised in the exclusive technique with which the sinks are made. Unlike industrial production in which the metal sheet is thinned during the moulding phase, Officine Gullo sinks are made exclusively with thick sheets. As for the rectangular sinks, a single metal sheet is folded and then welded by hand to obtain uniform thickness and a perfect result. For round sinks, the artisans of the company instead use the "sheet drawing" technique and certain specially created lathes: a brass or copper disk is manually placed on the mould from which the sink is shaped. In both cases, the metal is therefore not thinned during the processing phases, but retains the same thickness at each point, thereby ensuring unique durability and resistance. Among the finishes available, edge hammering is among the richest and is made entirely by hand.

Several combinations of materials for more styles

The sink basins can be made of brushed steel, brass or antiqued copper, whereas the edges and accessories are in solid burnished brass and can possibly be requested in two additional galvanic finishes that give the metal a touch with a more contemporary taste: brushed nickel or polished chrome. Thanks to the different combinations of materials available, tone-on-tone or contrasting, Officine Gullo sinks fit perfectly into any type of kitchen environment, from the most rustic of an ancient farmhouse in which a copper and brass combination is perfectly introduced, to a more modern and contemporary one, in which a combination of chrome and satin stainless steel is more ideal. Officine Gullo sinks can be inserted in any type of kitchen project, giving an important added value to the environment. A component thus becomes the protagonist of the area, offering style and character.

Unique design

Thanks to the manual skills of the company's artisans and the creativity of the Officine Gullo designers, steel, copper and brass are loaded with aesthetic and functional pluses, which enhance the washing area of every kitchen. The sink collection offers three types so as to fulfil the various design requirements: top-mounted, undermounted or semi-recessed. There are two possible shapes: rectangular or round.

Accessories

Aesthetics and functionality go hand in hand in every detail. The sinks are completed with accessories, such as the dish rack, the soap tray, the drain with relative cap and the waste disposal.

TOP-MOUNTED RECTANGULAR SINK WITH STEP

ACSTOPA00

*Sink material: Stainless steel / Burnished Brass / Copper
**Finishing: Polished Chrome / Burnished Brass / Satin Nickel
